

WELCOME TO ECCO.

We are proud to serve you the most authentic Neapolitan pizza this side of Naples. We utilise centuries old cooking techniques and use only the freshest ingredients imported from Italy which make up the anatomy of our pizza.

In addition, we use seasonal ingredients that come directly from local farmers and artisan producers.

Simple, honest, natural and healthy in its most purest form with no artificial additives, growth hormones or pesticides.

THE HEART OF THE PIZZA
This should be soft and elastic.

MOZZARELLA
Our mozzarella is incredibly fresh. We have it delivered every week from Naples. It is never more than 3 days old.

SAN MARZANO TOMATOES OR FRESH TOMATOES
Only the finest and sweetest broken into pieces by hand.

WOOD BURNING OVEN
Hardwood helps the oven reach over 1000 degrees.

THE CRUST
It should have a raised edge of approx 1-2cm, with few bubbles and burns and golden in colour.

SAN MARZANO TOMATOES

San Marzano tomatoes used by Ecco Pizzeria are renowned around the world for being the very highest quality.

FLOUR

Hand grown in the valley of Campania. Human hands shuck the wheat and allow the centuries-old mill to press and grind the finely culled grain into a flour.

MOZZARELLA

Our fior di latte mozzarella made from cow's milk and our bufala mozzarella made from buffalo's milk are incredibly fresh and flavourful and have a lovely creamy texture.

PASTA

It goes without saying we are mad about Neapolitan Pizza. Our style of pasta also originates from the same region of southern Italy, Naples! Simply put our fresh pasta doesn't come from a mass-produced factory.

Did you know...

Our durum wheat pasta flour has the highest protein content. We use a very specific type of flour called Semola and our pasta is simply made with water and flour. No eggs. Semola flour is simply coarsely ground, hard durum wheat, and not the regular soft wheat used to make bread. In addition pasta lovers will be glad to know that pasta is generally lower in carbs than rice, and the carbs it does have tend to have a less drastic effect on your blood sugars than those in rice.
